

BÙI THỊ HUYỀN TRANG

DATA ANALYST

14/09/2002 - 0393712032 - bthtrangie@gmail.com - Ho Chi Minh City

Portfolio: <https://bui-thi-huyen-trang-portfolio.vercel.app/>

EDUCATION

University of Economics and Law - Vietnam National University HCMC

Major: Faculty of Economic Mathematics

Program: High-Quality Program | GPA: 3.3 / 4.0

EXPERIENCE

DATA ANALYST

Vietstats Economic Data Analytics and Policy Strategy Consulting Co., Ltd. | August 2024 - July 2025

- Collected and curated over 1 million economic data records covering micro, macro, sectoral, and regional indicators, forming a core asset that enables Vietstats to provide comprehensive and reliable datasets.
- Automated data workflows with Python, Excel, and Google Apps Script to collect and clean large economic datasets, cutting processing time by 50% and boosting efficiency.
- Designed scalable data processing procedures and standardized input templates to optimize data collection while ensuring long-term data consistency and accuracy.
- Compiled and analyzed financial reports from approximately 800 companies listed on the HOSE and HNX exchanges, developing Power BI dashboards to deliver actionable insights for B2B clients.
- Conduct web traffic analysis (GA4), provide performance overview of each stages (acquisition, engagement, conversion).
- Building engagement and retention (cohort) framework, and planning on digital channel to tap on the touchpoints.
- Authored analytical reports on key sectors, offering policy insights and development strategies for government and business decision-making.

DATA ANALYST INTERN

YouNet Media | January 2024 - Jun 2024

- Created and maintained dashboards to track project progress and manage the performance and progress of part-time employees.
- Measured operational efficiency and key metrics for NLP model development.
- Recommended system and process improvements to increase productivity and stability.

PROJECTS

Financial Analysis project using Power BI

- Utilized Power Query to clean, transform, and shape datasets from multiple sources, ensuring data accuracy and consistency prior to visualization.
- Developed advanced DAX measures and calculated columns to build dynamic KPIs such as profit margins, cost ratios, and growth rates for in-depth financial analysis.
- Designed Power BI dashboards with drill-down features, enabling stakeholders to evaluate bank and industry performance from companies listed on HOSE and HNX.

TECHNICAL SKILLS

- Languages: Python, SQL, Excel (VBA)
- Data Analysis Tools: Excel (Advanced), Power BI, Looker Studio, Canva
- Databases: PostgreSQL, MySQL
- Statistics & Modeling: Economic Analysis, Market Trend Analysis, Statistical Analysis, Hypothesis Testing, Machine Learning Basics (Scikit-learn)
